

- ✓ Super Efficient LED lightbulbs
- ✓ Solar Panels to greatly reduce our energy consumption
- ✓ Comprehensive Recycling Program
- ✓ High Efficiency Washer and Dryers
- ✓ Energy Star Rated Air Conditioning

We here at Charlie's Motel and the Hurryback Tavern recognize that we have a responsibility to our community and the environment around us to do what we can to decrease our carbon footprint. Over the course of the last several years, we have installed large solar panels on our property, participated in a Energy Efficiency audit which resulted in a dramatic decrease in our energy consumption, initiated a comprehensive recycling program which includes both the motel and the on-site Tavern, and have made every effort to purchase only High Efficiency and Energy Star rated equipment and appliances. We are constantly on the lookout for new ways to decrease our impact on the environment and look forward to adding even more Green Initiatives in the future!
